INDEX TO VOLUME 104

Alphabetical Table of Contents of Authors

ANDERSON, WYATT W. See DONALD A. LEVIN

BOSSERT, WILLIAM H. See MADHAV GADGIL

BRASIER, C. M. Variation in a natural population of *Schizophyllum commune*, 191

CAUGHLEY, GRAEME. A comment on Vandermeer's "pseudo-reproductive value," 214

COHEN, DAN. A theoretical model for the optimal timing of diapause, 389

COHEN, JOEL E. A Markov contingency-table model for replicated Lotka-Volterra systems near equilibrium, 547
Erratum, 218

COPPINGER, RAYMOND P. The effect of experience and novelty on avian feeding behavior with reference to the evolution of warning coloration in butterflies. II. Reactions of naïve birds to novel insects, 323

CORBIN, KENDALL W., AND THOMAS UZZELL. Natural selection and mutation rates in mammals, 37

CROVELLO, THEODORE J. See ROBERT R. SOKAL

CROZIER, R. H. Coefficients of relationship and the identity of genes by descent in the Hymenoptera, 216

DA CUNHA, A. B. See H. M. L. DE SOUZA

DEFRIES, J. C., AND G. E. MCCLEARN. Social dominance and Darwinian fitness in the laboratory mouse, 408

E. L. DUNN. See H. A. MOONEY

FRAZZETTA, T. H. From hopeful monsters to bolyerine snakes?, 55

FUTUYMA, DOUGLAS J. Variation in genetic response to interspecific competition in laboratory populations of *Drosophila*, 239

GADGIL, MADHAV, AND WILLIAM H. BOSSERT. Life historical consequences of natural selection, 1

GIBSON, J. B. See J. M. THODAY

GRANT, PETER R. See LEIGH VAN VALEN

GROSSFIELD, JOSEPH. Species differences in light-influenced mating behavior in *Drosophila*, 307

GUTHRIE, R. D., AND R. G. PETOCZ. Weapon automimicry among mammals, 585.

JOHNSON, GORDON, Variations in diversity within benthic marine communities, 285

JANZEN, DANIEL H. Herbivores and the number of tree species in tropical forests, 501

XUM

KAPLAN, WILLIAM D., ROBERT L. SEECOF, WILLIAM E. TROUT III, AND MILTON E. PASTERNACK. Production and relative frequency of maternally influenced lethals in *Drosophila melanogaster*, 261.

KERFOOT, WILLIAM B. Bioenergetics of vertical migration, 529

LECK, CHARLES F. Comments on the seasonality of fruiting in the neotropics, 583

LEIGH, EGBERT G., JR. Natural selection and mutability, 301

LEIGH, EGBERT G., JR. Sex ratio and differential mortality between the sexes, 205

LEVIN, DONALD A. Developmental instability and evolution in peripheral isolates, 343

LEVIN, DONALD A. Reinforcement of reproductive isolation: plants versus animals, 571

LEVIN, DONALD A., AND WYATT W. ANDERSON. Competition for pollinators between simultaneously flowering species, 455

LEVIN, DONALD A., AND BARBARA A. SCHAAL. Corolla color as an inhibitor of interspecific hybridization in *Phlox*, 273

LEVIN, SIMON A. Community equilibria and stability and an extension of the competitive exclusion principle, 413

MCCLEARN, G. E. See J. G. DEFRIES

MCNAUGHTON, S. J. Fitness sets for *Typha*, 337

MASRI, A. M. See A. O. TANTAWY

MAYNARD SMITH, JOHN. Genetic polymorphism in a varied environment, 487

MAYNARD SMITH, JOHN. Population size, polymorphism, and the rate of non-Darwinian evolution, 231

MITCHELL, RODGER. An analysis of dispersal in mites, 425

MOONEY, H. A., AND E. L. DUNN. Photosynthetic systems of Mediterranean-climate shrubs and trees of California and Chile, 447

MOURAD, A. M. See A. O. TANTAWY

NEI, MASATOSHI. Accumulation of non-functional genes on sheltered chromosomes, 311

NUR, UZI. Evolutionary rates of models and mimics in Batesian mimicry, 477

PASTERNACK, MILTON E. See WILLIAM D. KAPLAN

PETOCZ, R. G. See R. D. GUTHRIE

PIANKA, ERIC R. On *r*- and *K*-selection, 592

RAND, A. STANLEY, AND ERNEST E. WILLIAMS. An estimation of redundancy and information content of anole dewlaps, 99

Reports of the Secretary, Treasurer, and Editors of The American Society of Naturalists, 495

ROBERTSON, ALAN. A note on disruptive selection experiments in *Drosophila*, 561

SANTOS, E. P. DOS See H. M. L. DE SOUZA

SCHAAL, BARBARA A. See DONALD A. LEVIN

SCHOENER, THOMAS W. Size patterns in West Indian *Anolis* lizards. II. Correlations with the sizes of particular sympatric species-displacement and convergence, 155

SEECOF, ROBERT L. See WILLIAM D. KAPLAN

SHAPIRO, ARTHUR M. The role of sexual behavior in density-re-

lated dispersal of pierid butterflies, 367

SING, CHARLES F. See RICHARD H. WARD

SINNOCK, POMEROY. Frequency dependence and mating behavior in *Tribolium castaneum*, 469

SMYTHE, NICHOLAS. On the existence of "pursuit invitation" signals in mammals, 491

SMYTHE, NICHOLAS. Relationships between fruiting seasons and seed dispersal methods in a neotropical forest, 25

SMYTHE, NICHOLAS. Reply to Leck's comments, 584

SOKAL, ROBERT R., AND THEODORE J. CROVELLO. The biological species concept: a critical evaluation, 127

SOULÉ, MICHAEL. A comment on the letter by Van Valen and Grant, 590

SOULÉ, MICHAEL, AND BARBARA RINDGE STEWART. The "niche-variation" hypothesis: a test and alternatives, 85

SOUZA, H. M. L. DE, A. B. DA CUNHA, AND E. P. DOS SANTOS. Adaptive polymorphism of behavior evolved in laboratory populations of *Drosophila willistoni*, 175

STEBBINS, G. L. The natural history and evolutionary future of mankind, 111

STEWART, BARBARA RINDGE. See MICHAEL SOULÉ

TANTAWY, A. O., A. M. MOURAD, AND A. M. MASRI. Studies on natural populations of *Drosophila*. VIII. A note on the directional changes over a long period of time in the structure of *Drosophila* near Alexandria, Egypt, 105

THODAY, J. M., AND J. B. GIBSON. The probability of isolation by disruptive selection, 219
Erratum, 500

TROUT, WILLIAM E., III. See WILLIAM D. KAPLAN

UZZELL, THOMAS. Meiotic mechanisms of naturally occurring unisexual vertebrates, 433

UZZELL, THOMAS. See KENDALL W. CORBIN

VANDERMEER, JOHN H. The community matrix and the number of species in a community, 73

VANN, EDWIN. The effects of various homologous chromosomes on the viability of *Drosophila melanogaster* lethal heterozygotes, 401

VAN VALEN, LEIGH, AND PETER R. GRANT. Variation and niche width reexamined, 589

VERMEIJ, GEERAT J. Adaptive versatility and skelton construction, 253

VUILLEUMIER, FRANCOIS. Insular biography in continental regions. I. The northern Andes of South America, 373

WAKE, DAVID B. The abundance and diversity of tropical salamanders, 211

WARD, RICHARD H., AND CHARLES F. SING. A consideration of the power of the χ^2 test to detect inbreeding effects in natural populations, 355

WASSERMAN, MARVIN. Egg-to-adult survival: an invalid measurement for determining preadult viability, 404

WILLIAMS, ERNEST E. See A. STANLEY RAND
